

Partner Success Story

Our Client

A PreK – 12 public school district on the Revillagigedo Island in Southeast Alaska, serving ~2,000 students across nine schools.

Their Challenge

As a remote island district, they faced persistent staffing shortages in therapy and behavioral roles. Alaska's strict credentialing requirements often delay start dates, and the district has previously experienced difficulties with staffing agencies cutting corners during the licensing process. With multiple agencies competing for placements in 2024, they needed a reliable staffing partner who can deliver qualified professionals, ensure licensure and compliance, and support long-term retention.

Our Teletherapy Staffing Solution

The district partnered with VocoVision beginning in 2024 to launch an innovative teletherapy program that addressed local talent shortages and ensured uninterrupted student services. By connecting students with remote SLPs and OTs, the district created a sustainable staffing solution that continues to expand:

- Started with full- and part-time, Speech-Language Pathologists (SLPs) and Occupational Therapists (OTs) in 2024.
- Recruited tele-therapists with Alaska experience for smoother integration into district standards.
- Preparing to support the district with remote candidates for psychology and behavioral services.

Today, VocoVision is the district's only trusted teletherapy partner – delivering reliable, innovative, and scalable solutions that grow with the district's needs.

Key Results

- **Exclusive Partnership with VocoVision for teleservices**
- **100% renewal rate of eligible candidates year over year**
- **10 total remote placements from 2024-2025**
- **All roles filled for the next school year prior to the start of summer**

"I have worked with VocoVision for the past two school years. I have been impressed with their personal attention to understand our unique district and find the best therapists to meet our student needs. Last year, they came to our district for an on-site visit to learn more about how we operate, and as a result were able to find qualified therapists that simply "fit" with us. This year we started the hiring process much earlier and we had a certified and licensed team in place prior to the start of the school year. Our school staff have nothing but positive things to say about working with their therapists! As I interact with Special Education Directors around the state, I will always refer them to VocoVision!"
