

Partner Success Story

The District

Located in a remote, rural region of Michigan, the district serves more than 4,500 students in both traditional and one-room schoolhouse settings.

Their Challenge

The district began working with us in 2021. Originally, they relied on us solely to provide Teachers of the Visually Impaired (TVIs) and Deaf and Hard of Hearing (DHH) specialists. While our onsite services proved effective, they were hesitant to leverage virtual services, uncertain how their students would respond. Following the COVID-19 pandemic, however, their need for behavioral and mental health support surged. The district struggled to find qualified professionals in their area, creating a pressing gap in student services.

Our Teletherapy Staffing Solution

Because of the consistent, high-quality talent we had already provided, the district turned to us for help with their behavioral and mental health talent needs. We were able to successfully place experienced virtual school psychologists and social workers, ensuring students had access to the mental health resources they required. The positive impact was immediate, and the virtual program has since grown into a model of success for their schools.

Today, the district looks to us as their primary partner for virtual special education services, including:

- DHH Specialists
- Occupational Therapists
- Psychologists
- Social Workers
- TVIs

Key Results

- **25 total virtual placements** - Expanded from two services (TVI and DHH) to a full suite of virtual special education service offerings
- **Long-standing partnership** built on continuity and results
- **Addressed** post-COVID behavioral health needs by placing school psychologists and social workers
- **Trusted**, go-to partner for virtual staffing services, with continued requests for additional therapy roles
